

Combination Mobile Crusher

The complete combination mobile crusher is the two-stage Combination Crushing plant. It is combined with the high-performance crusher, the high-performance PE series jaw crusher and high-performance vibrating screen, belt conveyor and belt conveyor under the screen which are integrated with the crusher, as well as integrated vehicle-mounted motor and electrical control cabinet. It is widely used for the crushing and screening work in the road and bridge construction, urban construction, metallurgy, energy sectors.

The features of the main machine are: it is economical and applicable to the small and medium sized customers. It is a multi-unit integrated and fully automatic system; the self-mounted devices include conveying and screening; is the complete and independent crushing pioneer equipment.

Combination Mobile Crusher Model Specifications

Model	JC840×1	JC1100×120	JC180×1300	JC250×1000	JC250×1200	JC400×600
	100	0				
Opening Size (mm)	840×104 5	1100×1200	180×1300	250×1000	250×1200	400×600
Max. Feed Size (mm)	720	930	150	220	220	350
Discharge Opening Range (mm)	100-225	150-275	10-30	20-40	20-40	35-85
Shaft Speed (r/min)	240	210	320	330	330	250
Capacity (t/h)	200-500	300-650	12-35	15-50	20-50	15-70
Mod Power (kW)	132-160	185-200	30	30	37	37
el Speed (r/min)	985	740	980	980	980	980

Dimension (mm)	3300×2320	4140×2660	1320×2150	1400×1850	1450×2150	1920×1460
(L×W×H)						
Weight (kg)	32000	59200	6000	5600	6000	6500

Combination Mobile Crusher Features:

- the plant is designed with ship-form structure made of steel and low chassis.it is light in weight.owning to the reasonably designed body,it's fransportation furning radius is quite samll wight high maneuverabilify.
- belt conveyor for re-crushing material can be twisted and folded for an easy mainfenance of equipments on site and a convenient replacement of accessories.
- belt conveyor above the vibrating screen can be folded and put one the vibratin screen to reduce the transportation space.
- Great work and easy maintenance.

Combination Mobile Crusher Benefits:

- the vehicle control cabinet is equipped with high-tech LCD touch screen and PLC control system.LCD touch screen wight human-machine dialogue function makes it process the functions of key start,misuse waring,protection,electrical control operations,fault and safe tips,which is convenient,high-efficient and secure.
- the outomatic-portable conveyor for return material make the installation of the whole plant is quite easy.
- landing legs adopt hydraulic lift mode which is of convenient operation and reliable performance.
- the [mobile crushing & screening plant](#) can be customerized in design.it can be manufactured either crushing first or conversely.
