

Mobile Jaw Crusher

Mobile Primary Jaw Crusher is a newly designed rock crushing equipment of our company. *Mobile jaw crusher* is mainly used in the industry of metallurgy, chemical, building materials, water power station which needs to change working site often, especially for processing stones used in high way, railway and so on. Many kinds of designs are for clients' choices according to different materials, scale and requirement of the final products. *Mobile Jaw Crusher Crushing Plant* largely expands the coarse crushing area.

Mobile Primary Jaw Crusher Model Specifications

Mobile Primary Jaw Crusher Features:

- High-performance crusher, great crushing ratio, and powerful crushing pioneer.
- Work with the integrated machines of jaw crusher, cone crusher, vertical impact crusher, feeders and vibrating screens.
- With vehicle installation of sieve under the belt, vibrating screener and crusher.

Mobile Primary Jaw Crusher Applications:

- Aggregate operations
- Medium size mines
- Road construction
- Railway engineering
- Waste management
- Demolition sites
